

AWARENESS WORKSHOP ON PLASTIC WASTE

On Monday, the 7th of August 2023 a special workshop by **Indian Pollution Control Association (IPCA)** was organized for all PYP children, with the objective to raise awareness regarding the **crucial environmental issue of 'Plastic Waste'**. *IPCA*, a Delhi-based NGO committed to environmental sustainability for the past 21 years, organized the workshop which focused on their project D.R.O.P (Development Responsible Outlook for Plastic).

The primary aim of D.R.O.P. is to minimize plastic waste generation and littering while simultaneously strengthening the collection and recycling of plastic waste.

The IPCA team members explained optimum resource utilization and reduction of plastic waste through an entertaining street play which they enacted for the children. The street play aimed at fostering a responsible outlook among waste generators by providing actionable solutions for plastic waste management.

The interactive session deepened the students' awareness about the hazardous environmental and health impacts of the usage of plastic on our planet Earth. The workshop concluded with a pledge to work towards eliminating plastic in our environment. The pledge taken by the students inculcated love and care for nature as part of their lives.
